

PH Assisted Living Residence 15th Anniversary

This year marked the 15th Anniversary of Park Hill Residence, a small, intimate assisted living facility known for its quality of care and longevity of staff. To celebrate, a backyard party and ice cream social were enjoyed by residents, families, staff, and local community.

This year's Anniversary Celebration joined National Assisted Living Week, which is an annual week long celebration. "Forever Proud" was this year's NALW

theme for the Sept 11-17 week. Red, white, and blue was seen everywhere and all of the staff wore special t-shirts for the festivities. An Italian buffet, American flag cake, live music, and staff recognition were part of the special evening.

Park Hill Residence was originally constructed at 1901 Eudora St. as a convent for the Sisters of Loreto in the 1940s. Subsequent renovations of this beautiful English Tudor-style building

have preserved its original charm and character. It was dedicated as an assisted living community in 1996. Cozy rooms provide privacy for all residents and spacious common areas include recently redecorated living room, dining room and sunny sitting room areas. High ceilings and beautiful woodwork impart a warm and friendly ambience. Family-style TV rooms on the first and second floors allow for optional program viewing, activities and visiting with friends and family.

Park Hill Residence is home to 36 senior and older adults with disabilities. Featuring mostly private accommodations, a rewarding activity program, and offering three home-cooked meals and 24 hour staff assistance plus a great location.

Park Hill Residence accepts Medicaid Approved HCBS waivers and is owned by Senior Housing Options, Inc., a non-profit organization celebrating over 30

years of service. SHO operates thirteen residences serving over 500 older adults in communities in Colorado while assisting those of low and moderate incomes. Thank you to all of our donors

and volunteers who help make this a unique part of the Park Hill neighborhood.
